

SUSTAINING ECONOMIES AND NATURAL RESOURCES IN A CHANGING WORLD:

KEY ROLE OF LAND GRANT UNIVERSITIES

APRIL 2-3, 2013 | REITZ UNION | UNIVERSITY OF FLORIDA | GAINESVILLE, FL

Addressing research and extension opportunities and partnerships in:

- Food Security and Agricultural Production
- Infrastructure and Transportation
- Energy
- Sustainable Development (Coastal and Inland)
- Wildlife and Natural Systems Management
- Sustainable Resource Policies

Sustaining Economies and Natural Resources in a Changing World

is designed to bring scientists, leading resource managers, and industry representatives together to discuss the complex challenges facing Florida and the world and the research and technologies needed to address them.

- Agricultural association leaders
- Corporate Leaders
- Developers
- Energy and utility leaders
- Environmental groups
- Non-Governmental Organizations
- Policy makers
- Resource and ecosystem managers
- State and Federal agencies
- University faculty and students
- Urban and regional planners

The symposium is designed to allow academic, agency, and business representatives to network and discuss potential solutions to the complex problems facing our economies and natural resources at local to global scales
